

## USE OF A PROTRACTOR

Name: \_\_\_\_\_

Assessment Criteria: Measure angles and draw angles to the nearest degree, when constructing models and drawings or using shapes

1. Measure both angles marked 'a' and 'b' in this diagram.

a = \_\_\_\_\_ °

b = \_\_\_\_\_ °

2. Construct each of the following angles accurately using a protractor. Label the angles clearly.

a) 32°

b) 121°

c) 236°

3. Using the line AB below as a base, construct an equilateral triangle.

Overall, I think my success level is:

Low	High
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

Q	USE OF A PROTRACTOR	😊	☹
	I can measure an acute angle		
	I can measure an obtuse angle		
	I can measure a reflex angle		
	I can construct an acute angle		
	I can construct an obtuse angle		
	I can construct a reflex angle		

I need to practise ...
